

Planned Flaring

From 8th April we will begin preparations for our plant stand down and £140m upgrade.

Based on current schedules, the main phase of stand down will begin on 12th April and will require us to use our elevated flare for a limited period during that day.

The use of our flare is planned, is part of its design, and is completely safe.

We want to thank the community for their patience as we carry out our upgrade work which will help us to reduce flaring by improving reliability.
