

# Elevated flaring now complete

**We are pleased to confirm that we have safely completed a key stage of our operational stand down, and are no longer using our elevated flare.**

**We hope that the actions we took in advance, to significantly reduce both the size and duration of the flare, helped to minimise any community disruption.**

**Over the next two days, we will complete the remaining stages of the process, but we anticipate any associated flaring should be contained in the Ground Flares.**

**We thank you for your patience and understanding while we undertake our plant upgrade.**

**Martin Burrell, Plant Manager**
