

8 January 2020

Dear Community Member

We are often asked to provide more insight to the operations of the Fife Ethylene Plant so, as we get closer to our safe re-start, we have launched a new animation to help explain how we safely deliver our production process.

The animation can be viewed and shared here: [Making Ethylene](#)

We are keen for as many people as possible to see the animation, so your help to share the link via your own networks and channels would be greatly appreciated (we are also posting it on our own social media platforms).

We hope this proves helpful.

Regards

Jacob McAlister
Plant Manager
