

**26 January 2020**

Dear Community Member

We have now begun the use of our elevated flare.

The use of our flare is safe and is required to complete the re-start of our operations.

We are continuing to work hard with the aim of reducing both flare size and duration.

A safe re-start is our priority and we will keep you updated on progress throughout.

Should you have any questions, please let us know.

Regards

**Jacob McAlister**  
**Plant Manager**
