

# Fife Ethylene Plant - Enclosed Ground Flare Project (EGF) Community Update - January 2022

**Key Benefits:** Reduces use of elevated flare by at least 98% ✓ Quieter than a petrol lawnmower ✓ No vibration ✓ Largely invisible on clear day or night ✓ Completely smokeless ✓ Hidden flame ✓ 1/3 height of elevated flare ✓

## Progress Update

- Project remains focused on start-up by December 2022
- Final inspections for combustion chamber completed
- First pre-cast foundations for flare header due for delivery in early February
- Burner pipework deliveries anticipated imminently
- Flare header materials and fabrication started at local business Langfields

## Stakeholder Communications

- Project update provided to members of Mossmorran Community Liaison Group
- New video being launched to provide detailed insight to EGF operation
