

BAT

Best Available Techniques (BAT) is a multi-million pound programme to reduce the frequency and impact of flaring for local communities.

So, how are we doing that?

14 STEP PLAN

12 STEPS TO REDUCE FLARING EVENTS

Updating procedures

Modernising systems

Enhancing training

2 STEPS TO REDUCE AMENITY IMPACT SHOULD WE NEED TO FLARE

New elevated flare tip – Summer 2020
(will reduce noise, light and vibration).

Purpose-built ground flare
(will reduce need to use elevated flare).
Reduced amenity impact.
